

Four out of 10 leads are never reached, even after three calls.

Research has also shown that a salesperson is more likely to reach a prospect within 5 minutes of their form submission. But not many sales teams are staffed to respond quickly enough.

It's challenging for sales people to turn more leads into sales when they're busy weeding out non-quality leads and servicing existing accounts. **LeadConnect** helps you significantly improve your contact rate and gets quality live leads to your sales team, so they spend more time actively selling.
